BRANCH ADVISORY COUNCIL
RECORD OF DECISIONS – WEDNESDAY, 8 MAR 2023

RECORD OF ATTENDANCE

POSITION / APPOINTMENT	RANK & NAME
Chair / Branch Leader	Brigadier-General Dave Yarker
Co-Chair / Branch Advisor	Colonel John Roper
Member / Colonel Commandant	Brigadier-General(Retired) Josée Robidoux
Member / Branch Chief	Chief Warrant Officer Alex Arndt
Member / General Officer	Brigadier-General Denis Boucher
Member / General Officer	Brigadier-General Pascal Godbout
Member / Strategic A6	Colonel Alan Ferriss
Member / Director Signals	Colonel Dan McKinney
Member / Comd CFIOG	Colonel Corey Crosby
Member / Home Station Commandant	Lieutenant-Colonel Bahir Ali
Member / STA	Chief Warrant Officer Frederick Lavoie
Member / STA	Chief Warrant Officer Craig Adamson
Member / Home Station RSM	Chief Warrant Officer Simon Jobin
Secretariat / Branch Adjutant	Major Gavin Ellis
Guest / Primary Reserve Representative	Lieutenant-Colonel Lisa Smid
Guest / Primary Reserve Representative	Chief Warrant Officer Tracy-Ann Fisher
Guest / Home Station Staff Officer	Lieutenant Simon Grant

INTRODUCTORY REMARKS

1. The Branch Leader and Branch Colonel Commandant presented a pace stick to the previous Branch Chief, CWO Gilles Philibert, in recognition of this guidance to the Communications and Electronics Branch (C&E Branch).
2. After the briefest of opening remarks, the Branch Advisor was invited to continue with the meeting as per the agenda.

INCOMING BRANCH APPOINTMENTS & INCUMBENTS

3. The new Member of the Year could not make the meeting due to unforeseen conflicts and will be invited to join the next meeting.
4. LCol Lisa Smid, CO 31 Signals Regiment, and CWO Tracey-Ann Fisher, Regional CWO for Ontario, were introduced as guests to the BAC and representatives of the Primary Reserve.

5 YEAR REUNION DISCUSSION

5. The Branch Leader and Colonel Commandant were engaged by the retired community who indicated that they would organize an event similar to the Five-Year Reunion. This was done after the Branch would not support such an event this year. The Branch decision was driven by the Chief of Defence Staff direction on CAF Reconstitution to limit effort to only core activities. The effort needed to organize such an event is not in line with that order.
6. The Retired Officer and Senior NCM(ROSEN) Dinner is held annually at the beginning of June. Discussion revolved around how the Five-Year Reunion and ROSEN could be supported or what new form they could take. Direction was to look at C&E Week and determine how best to pull in the retired community. Branch will focus on a combined list of activities in 2024 that includes reunion events with a ROSEN dinner over the same weekend.

ACTION ITEM(s):

7. Branch Leader: To send out a letter to the C&E Community supplying details on the 5 Year Reunion and why it could not be supported this year.
8. Branch Advisor: Engage with retired community and discuss increased ownership of the events discussed.
9. Branch Office: Build out the C&E Week COAs to include increased veteran engagement.

C&E WEEK 2022/3: COA AND THEME DISCUSSION

10. Three COAs, found on slides 7 to 10 in Annex A, were provided to for discussion with the following summarized comments.

11. Themes: 120th Anniversary, Reconstitution, Looking to the Future
 - a. Selected: Reconstitution
12. Additional discussion resolved around C4ISR and Beyond, a conference put on by Vanguard and recommended to be promoted by the Branch and for the branch to potentially become a military sponsor of the event. The Branch to reach out to Col Francois Caron, Director Military Digital Operations – CCSI.
13. Additional comments included:
 - a. examining the potential to assign specific tasks to Commanding Officers to ensure that these responsibilities are completed properly;
 - b. ensuring the delivery of quality content for our members so that they, and their chains of command who send them, see the return on investment of attending C&E Week;
 - c. as all activities undertaken by CAF units are under the CAF Reconstitution order we must link them to strategic and operational objectives;
 - d. retention is a key part of our Reconstitution as C&E trades are quickly losing members:
 - 1) what can we do to motivate these members to stay; and
 - 2) what strategies could we leverage outside of increased pay such as new technology, what can be brought in, faster postings, slower posting, what are on the C4ISR and CMP fronts.
 - e. volunteer committee approach is not working, we must order members units to complete the required tasks;
 - f. the Army G6 Conference may be schedule at the beginning or the end of the week with a deliberate weekend day to include the Primary Reserve;
 - g. A6 CAPCON to remain a Monday/Tuesday;
 - h. recommendation to include the Branch update at the beginning of the conference to kick it off and to better provoke the working groups that would also follow C&E Week PD sessions;
 - i. working groups should also follow the PD sessions;
 - j. CFSCE Digital Campus could be leveraged to record, document and enable discussion on the events during C&E Week;
 - k. shifting C&E Week to Ottawa would result in members not returning to the Home Station to visit it and the surrounding area;
 - l. working groups could be geographically separated (i.e., Kingston, Ottawa, Edmonton, etc.) to allow C&E Week to engage with additional groups across Canada;

- m. mess dinners were discussed to potentially stay as a combined mess dinner on Friday rather than Thursday;
- n. two dinners were recommended, one a traditional mess dinner and the second something more akin to a field mess dinner should be considered that could draw in junior members who may not want to spend \$150 on a formal mess dinner;
- o. structure suggestions included; a day of thought provoking, working group and interworking group discussions, fix audience in Kingston with out briefs on Saturday morning;
- p. working groups are a mix of in person and virtual groups across the country with 10-12 members each;
- q. products from each working group are consolidated and 3-4 are chosen to be briefed to the audience on Saturday;
- r. working group creation could be driven by units themselves self identifying issues and the originating CO would then lead that working group. Formation Commanders or equivalents would then be used to consolidate the results; and
- s. PRes rep, LCol Smid, has volunteered to host a working group on communications in the North.

ACTION ITEM(s):

- t. Branch Office: Early April C&E Week COA proposal is sought by the Branch Leader.
- u. Branch Office: Reach out to Col Francois Caron to explorer how the Branch could become more involved in C4ISR and Beyond.

BRANCH COMMUNICATION DISCUSSION

- 14. The BAC identified that a new MS Teams footprint may not be the way forward with multiple Branch related channels already available, furthermore MS Teams is not as widely used outside of the NCR which may hinder its use as a means to communicate to the Branch as a whole.
- 15. Use of the Branch CWO's Junior Council to engage the membership on communications strategies which the Chief has already started.
- 16. The use of CFSCE's Digital Campus as a means for the branch to transparently communicate to the membership was discussed with including some of the features to summarize what is being discussed within the environment monthly.

BRANCH FINANCIAL UPDATE

17. Branch Adjutant summarized slide 15 for the BAC. The Branch Chief also provided an update on the three members who received \$1000 each from the Branch Distress Fund including:
 - a. Member from 77 Line Regiment was supported after a family member passed and the member was left with numerous financial challenges as a result.
 - b. A CFCSE member was hospitalized that resulted in the self-employed spouse required to care for the member and their children.
 - c. A CFSCE member had their home burn down with complete loss of all their belongings.
18. P070 monthly pay deductions dropped below the \$5,000 mark for the first time with no new deductions being added for at least a year.

BRANCH HONOURS & RECOGNITION

19. The Branch Chief provide a short update. There is one Branch Commendation pending which the Branch Chief recused himself from as he knows the member personally and there were no updates for any other awards.

ENVIRONMENTAL BRIEFS / SITREP:

20. **CFIOG SIG INT / Cyber Op (Col Crosby)** – Provided a summary of slides 18-20. The Cyber Operator trade is trending upwards at 80% PML with DP1 training generating new members regularly. The challenge is at the Sgt-WO level who are being burnt out as they conduct operations while also mentoring a new generation of Cyber Operators. The deployment opportunities are generating interest and keeping members excited.
21. SIGINT Specialist is also trending upwards and 84% PML filled. They have similar challenges as the Cyber Operators at the Sgt/WO level with deployment pressures leaning on the Sgt level in particularly. OUTCAN postings are energizing the trade, with a number throughout the US and UK. 20 members working within CSE lines are also gaining experience working within the field but outside of the CAF.
22. A summary of slide 18, Cyber Opportunities Portal, was provided. There are several opportunities for any occupation within the Cyber Force, the Combined Cyber unit and expeditionary Cyber.
 - a. Cyber Force Opportunities (mil.ca)
23. **RCAF CELE / ATIS (Col Ferriss)** – The F35 purchase has been officially announced and as the purchase is being evaluated it is becoming clear that the Branch will have to support the C4ISR capabilities that have been purchased. Additionally, the RCAF is moving towards cloud-based command and control to replace the RCAF air battle management system and to monitor airspace in North America. IOC is scheduled for September in 22 Wing with added points of presence to be installed into Winnipeg, the NCR and CJOC. This will extend the US level 2 data center into

Canada collaborating with Amazon Web Services to attach edge devices in these locations. Initial connection is via land line with a backup connection via Starlink.

24. **CELE Update** – 2 June graduation of a CELE course at CFSCE that will bring the trade to 94% PML. The updated mentorship channel on MS Teams has been a success, particularly the use of the push mechanism to inform the members of trade related news.
25. **ATIS Update** – Current PML sits at 74% trending upwards. The trade has completed an update of the ATIS QL3 QS inline with modernization and reconstitution with a TP Board to be sat soon, the next bound is the OJPR (June) followed by the QL5 (Sep). From the latest recruiting numbers, it is expected that 45/62 seats be filled of the FY22/23 SIP. FY 23/24 SIP has been increased to 80 non-skilled entry, and 8 NCM-STEP with trade leadership working with the RCAF Attractions Team to meet this target to include specific RCAF recruiting events and college visits;
26. **Director Signals (Col McKinney)** – Transition of the D Sigs position continues with G6 becoming a post command LCol under Army COS Ops, the stand up of Director Digital and Army Combat System Integration (DDACSI) with potential TOCA of 1 April 2023 and DLCI moving under Army COS Strat. Current SIP numbers are not as favorable as some other trades:
 - a. Sigs – 67/125 (54%)
 - b. IS Tech – 62/102 (61%)
 - c. Line Tech – 11/71 (15%)
 - d. Sig Op – 81/102 (79%)
 - e. Sig Tech – 14/63 (22%)
27. CMP was engaged 6 months ago with concerns surrounding how tech trades were being recruited stressing that these trades were not like the rest of the Army and a specific Tech recruiting campaign would be needed. Additionally, the value proposition for military members is lost when compared to the civilian workforce as Cpls can release and be selected for an IT2 or IT3 position with a \$20,000-\$30,000 pay raise.
28. **Primary Reserve (PRes)** – LCol Lisa Smid provided an update on four new positions, enabling the PRes to have a representative in each Division HQ. These positions report through CFSCE to provide PRes concerns on training, equipment, resources, etc. RQ Sig Op Review Board was completed and is pending approval while a CFSCE waiver approval has been made available for the summer training period. RQ Sig Op Cpl, 133 trained and approval to use the legacy training program until an updated package is available. RQ Sig Op Sgt, 8 positions have been provided for the next course. 26 Signals Officers have also been trained. A new mission task for HF has been submitted and the reserve community is excited to take on this task. 11 Signalers are preparing for deployment with further deployments certainly forth coming.

OPEN FORUM / ROUND TABLE / QUESTION PERIOD

29. CFS Leitrim experienced an incident of hateful conduct as a swastika was drawn on a bathroom wall. Military police were involved, and a station stand down to enable leadership discussion and to enable additional communication from leadership that incidence such as this are not acceptable and should not be happening.
30. 21 EW Regt will be conducting Ex Spectrum Verify in Petawawa with a visit day on 27 April.

31. The CDS stated publicly that there is a debate on going about the stand up of a Cyber Command.
Recommendation: C&E Week working group to evaluate what a Cyber Command would mean to those in the Branch.

Location: Kingston

Key Adds:

- 1000 start to allow PST participation
- Friday Mess Dinners
- C&E Leadership participate in Saturday PRes Conf
- Evening Branch Update

Positives:

- Longer Wrk Groups
- Increased PRes Participation
- Similar to 2022
- Increased virtual Attd. By West Coast

Challenges:

- Dinner Attd.
- Longer Week for Snr members

10

Slide 10

C&E Week - Risks

Risk	Cause	Impact	Probability
Decrease in dinner Attendance	Scheduling mess dinners on Friday	Reduced Branch cohesiveness / missed opportunity to strengthen Branch culture.	High
Decreased interest in Branch of Western Canada and PRes Units	Inability of units to participate in Branch activities	Branch influence/ fundraising decreases.	Medium
Junior Branch members do not engage with Branch	Focus on leadership at C&E Week / NCR focused activities	Cultivation of Branch History and Heritage is weakened. Decreased fundraising.	Medium / Low

National Defence / Défense nationale

Cyber Opportunities Portal

[Cyber Force Opportunities \(mil.ca\)](http://Cyber Force Opportunities (mil.ca))

Cyber Force Opportunities

Overview

The CAF Cyber Forces conducts full spectrum cyber operations, security cooperation and capacity building. A primary mission of the Cyber Force is the defence of CAF systems and networks, but it also conducts a range of other missions and tasks.

In response to the Russian invasion, CAF Cyber Forces immediately initiated support to Ukraine to bolster its cyber defense capabilities. This includes providing Ukraine with cybersecurity expertise, cyber threat intelligence, software tools and technical solutions which allows them to better defend their networks against malicious cyber activities.

In the current security environment, the threat is not limited to Ukraine and therefore as an element of Canada's commitment to North Atlantic Treaty Organization (NATO) Allies, in response to a request for support, CAF Cyber Forces also established a deployed Task Force in Riga, Latvia that supports joint threat hunt operations to illuminate and enable action against cyber threats.

In addition to defensive actions, the CAF Cyber Force continues to work with CSE to deliver offensive effects in support of national objectives. The demand for CAF Cyber capabilities continue to grow, generating many opportunities within our team for regular and reserve force personnel as well as civilians. For personnel with the right skills and attributes, these openings include postings, deployments and integrated positions within allied and partner organizations.

Expressions of Interest

This portal provides a forum for DND/CAF personnel to learn about opportunities and express an interest in employment within the CAF Cyber Force. This forum does not supersede individual chains of command or career management processes. After browsing the page, should you wish to submit your name, please complete the form at the link below. Successful candidates will be chosen through the discussion with supervisors and career managers, aptitude testing, interviews and ultimately a board selection process. Candidates will be engaged within individuals within two weeks of receipt of an application form and updates will be provided throughout the process.

Form

[SUBMIT YOUR INTEREST >](#)

Espionnary Cyber

Offensive Cyber

CYBER FORCE ORGANIZATIONS

Combined Cyber Unit

The Combined Cyber Unit (CCU) is the CAF's contribution to the joint CANS/CSE team conducting offensive cyber operations in support of Canadian objectives. Members of CCU may be integrated into CSE and perform roles including testing operations, mission planning, target discovery, signal development, capability development and reporting.

Members may include:

- Countering adversary cyber operations
- Countering cybercrime
- Countering violent extremist organizations
- Supporting CAF operations

Canadian Forces Network Operations Centre

The Canadian Forces Network Operations Centre (CFNOC) is the CAF enterprise security operations centre and the mounting unit for decoupled joint cyber capabilities. It is comprised of CAF members and Department of National Defence (DND) civilian employees. Members of CFNOC may be employed in a variety of areas including:

- Network monitoring
- Decoupled cyber defence teams
- Threat hunting
- Cyberthreat intelligence
- Forensic analysis
- Incident response
- Vulnerability analysis
- Capacity development

Other Cyber Force Organizations

The special elements of the CAF Cyber Force are enabled by numerous other DND/CAF Headquarters and other organizations. The Force has organizations to plan, coordinate and conduct operations, manage projects, conduct capability development, provide training, and provide legal and policy advice. Other activities include:

- Integrating defensive cyber operations into broader military operations
- Coordinating DND/CAF cyber activities and cyber events
- Coordinating with other government departments on planned activities and event responses
- Seeking authority for cyber operations and developing strategic and operational policies
- Major and minor capital projects supporting cyber operations capabilities
- Managing the Cyber Mission Assurance Program (CMAP)
- Engaging with other government departments, allies, industry partners, and academia
